EDUCATION

Boston University — **Boston, Massachusetts**
*M.S. in **Computer Science** & Artificial Intelligence* — *Expected May 2028*

San Jose State University — **San Jose, California**
*B.S. in **Data Science*** — *Graduated May 2026*

Relevant Coursework: Product Management, **Machine Learning**, Applied Statistics, Processing Big Data, Data Structures & Algorithms

EXPERIENCE

Cyphelink — **Sacramento, California**
Founder — *January 2025 – Present*

- Founded an **AI**-powered referral-triage product for specialty clinics and guided it from **conception to launch**: **user research** interviews with referral coordinators surfaced the core problem, urgent patients buried in unlabeled inbound faxes.
- Defined **user requirements** with clinical staff (zero missed urgent referrals) and enforced them as a product rule: the model may only mark a referral routine when the clinical content and the referring provider's own label agree.
- Caught the LLM downgrading an urgent case in eval review; **iterated quickly** with a guardrail and re-ran evals to **0 missed urgent cases**.
- **Launched** fax ingestion, per-clinic urgency criteria, and EHR integration; **tested performance** with usage telemetry and **presented** results to non-technical clinical staff, converting a two-month paid pilot into a recurring contract.

Wavz for Digital Transformation — **Cairo, Egypt**
Cybersecurity Engineer Intern — *May 2024 – August 2024*

- Defined requirements for an automated threat-detection pipeline with **cross-functional** engineering and security teams in **Agile** sprints.
- Shipped an automated logging feature that cut threat detection time **30%**; **presented** results to engineering and operations leads.

De Anza College — **Cupertino, California**
C++ Tutor — *January 2023 – May 2023*

- Led weekly lab sessions and office hours; mentored students one-on-one on **project planning** and **iterative development**.

CERTIFICATIONS

- **IBM AI Product Manager Professional Certificate** (In Progress): end-to-end **product life cycle**, from definition to deployment
- **Google AI Professional Certificate**: Generative AI workflows, **prompt engineering**, and LLM implementation

SKILLS

Product: User Research, **Product Roadmap** & Prioritization, Requirements & Specs, **Success Metrics** & KPIs, **A/B Testing**, **Agile**, **Figma**
Technical: Python, **SQL**, **Data Analysis**, **Machine Learning**, Causal Inference, **LLMs** & Agentic AI, AI APIs (Claude, AWS Bedrock), Tableau

PROJECTS

Causal Inference & Uplift Modeling (Senior Capstone) — *Python, SQL, Scikit-learn, CausalML, XGBoost*

- Framed campaign targeting as a causal question (who converts because of it vs. anyway) and ran **data analysis** on 14M+ records.
- Trained tree-based uplift meta-learners, improving incremental conversion **15%** (Qini/AUUC) over the baseline targeting rule.
- Built the **business case**: turned effect estimates into a cost-vs-benefit targeting policy per segment, cutting wasted spend.

Allergen AI Lens – LLM-Powered Menu & Label Risk Analyzer — *Python, FastAPI, HuggingFace Transformers*

- **Launched** a food-safety app that flags allergen risk from menu and label photos with **Generative AI**, scoped to the riskiest **user journey**.
- Implemented zero-shot classification (BART-MNLI) and keyword matching; shipped risk badges with plain-language explanations.

Driving Coach – Product-Led Mobile & AI Platform — *TypeScript, React, Supabase, Figma*

- Defined the **product vision** and **MVP roadmap** from **user research** on driver-safety pain points and **competitive analysis**.
- **Iterated** Figma prototypes across **design** reviews; ran customer interviews to set per-release **success metrics** for AI coaching insights.

ACTIVITIES AND LEADERSHIP

BAMREC, *Assistant Athletic Director* — *January 2024 – May 2025*

- Led **entrepreneurial outreach** and marketing initiatives to grow community engagement.
- Managed a **cross-functional** team of directors, coaches, and staff; developed **innovative solutions** to resource and operations conflicts.

Boy Scouts of America, *Eagle Scout* — *2016 – 2024*

- Led a 6-month community build, **presenting** the plan to stakeholders to raise $6,000 and managing construction; 800+ service hours.
